

Software engineer

To play a key role in building new satellite derived products and services serving international development goals

The Role: eOsphere has a vacancy for an enthusiastic software engineer to play a key role in building new products and services serving international development goals, especially in Mongolia. Some experience working with imagery would be advantageous. In particular any knowledge of satellite earth observation, geographic information systems, web mapping and visualisation technologies would be useful.

The successful candidate will join our experienced team developing products and services for monitoring key environmental parameters derived from satellite earth observation imagery, such as snow and soil moisture for monitoring drought and desertification, fires, land cover and biomass for livestock pastureland management.

The role will require a close working relationship with customers and industry partners in workshops, requirements gathering, user testing and related activities.

The role will require travel abroad.

Required Skills and Experience:

- A good Degree in Physics, Engineering, Mathematics, Informatics, Electronics, Physical Geography, or similar field. Candidates with Masters degrees or PhDs are encouraged.
- Experience in one or more of the following languages/scripting: C/C++, Python, Javascript, Perl, bash/sh, on Linux and Windows platforms.
- Some knowledge or experience of EO data handling, storage and web mapping and visualisation technologies such as OpenDataCube would be useful.
- You should have excellent interpersonal skills and have a proven ability to summarise and present complex information.
- Good team worker.
- We prefer co-workers who are naturally curious and not afraid to ask questions.
- eOsphere's work takes us around the world, so candidates must be prepared to travel.

About us: eOsphere was established in 2001 and is strongly focused on solving real remote sensing problems for a wide range of customers and end users. Key application areas include the provision of satellite ground receiving stations for environmental and hazard monitoring around the world, including: Mongolia, China, India, UK, Iraq, Sudan, Malaysia, Indonesia, Vietnam, Greece, Ecuador and Cuba. eOsphere is now looking to develop a new range of environmental products and services to build upon its worldwide links, which is why this new role has arisen.

eOsphere is a small company which means we can be fast to react to events and where we all have to work flexibly together to achieve our goals.

Location: Building R103, Fermi Avenue, OX11 0QR, Harwell, Oxfordshire, UK.

Equal Opportunities: eOsphere is an equal opportunities employer and commitment to this process will be expected.

How to apply: Please email your CV and covering letter to nick.walker@eosphere.co.uk
